Detailed Acti n

1. This communication is in response to the application filed on July 22, 2003

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-13, 30-34 and 64-85 drawn to a system describing a database subject using a plurality of natural-language terms, each of such plurality of natural-language terms having relevance to the subject according to an involved subset of such populations of users, classified in class 707, subclass 4

II. Claims 14-29 are drawn to directed to a business system for developer of web computer systems to provide computer systems to operate essentially without customer website management, classified in class 705, subclass 51.

III. Claims 35-63 are drawn to an Internet website client-server computer system in a set of natural-language terms to be rated as to relevancy of each subject , classified in class 704, subclass 10.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. Because a database subject using a plurality of natural-language terms, each of such plurality of natural-language terms having relevance to the subject according to an involved subset of such populations of users is different a business system for developer of web computer systems to provide computer systems to operate essentially without customer website management. And an Internet

website client-server computer system in a set of natural-language terms to be rated as to relevancy of each subject is different from the groups I and II. In the instant case, each of the respective inventions have separately utility as in a system not having the others. See MPEP § 806.05(d).I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.

A telephone call was made to Attorney. Martin L. Stoneman (Reg. No. 18,147) on December 21, 2004 to request and oral election to the above restriction requirement, but did not result in an election being made.

Applicant are advised that the reply to this requirement to be complete must include and election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

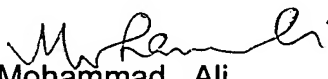

The response time for such action is one month (30 days).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mohammad Ali whose telephone number is (571) 272-4105. The examiner can normally be reached on Monday-Thursday (7:30 am-6:00 pm).
